## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

5 Applicant: Ting-Chang Chang Examiner: Powell, William  
Po-Tsun Liu  
Yi-Shien Mor

Filing Date: 07/03/2001

Art Unit: 1765

App. No.: 09/681,986

Docket No.: NAUP0377USA

10

Title: Method of avoiding dielectric layer deterioration  
with a low dielectric constant during a stripping  
process

15 To: Assistant Commissioner of Patents  
Washington, D.C. 20231

Subject: Missing parts in Notice of Allowability dated  
11/20/2002

20

Dear Sir or Madame:

A Notice of Allowability was mailed on 11/20/2002,  
indicating acceptance of claims 1-17 in the above-indicated  
25 application. However, the Notice of Allowability also indicated  
that new formal drawings must be submitted in response to a  
Draftperson's Patent Drawing Review (PTO-948), which was  
allegedly attached with the Notice of Allowability (part of  
paper No. 3). Unfortunately, the PTO-948 sheet was not actually  
30 attached with paper No. 3, and so the Applicant is currently  
unable to respond to the objections purportedly raised in the  
PTO-948 paper.

GROUP 1700

On January 23, 2003, a telephon interview was held with the Examiner requesting information about the missing PTO-948 so as to be able to respond with the appropriate corrected  
5 drawings. The Examiner responded that a formal request for the PTO-948 sheet must be submitted.

In light of the above, it is requested that the Draftperson's Patent Drawing Review sheet PTO-948 be sent to the Applicant,  
10 and that the period for reply be accordingly reset as this critical piece of information was lacking from the originally sent Notice of Allowability. Once the PTO-948 sheet is received, the Applicant will be able to properly respond with corrected drawings.

15

Sincerely yours,

20
